

STRATEGIC OVERVIEW 2019

Strategies and Broad actions

VISION	MISSION
<p>Short term: Ecodemocratic decision-making processes are tried and tested</p> <p>Long term: Ecodemocracy is a respected and widely implemented mode of decision-making</p>	<p>To create, foster, and campaign for political, administrative and legal initiatives to help adequately represent non-human nature within democratic processes</p>

KEY DEFINITION: Ecodemocratic decision-making processes are those in which non-human nature is given fair representation in line with its moral and, where established, its legal standing

1 Map the existing landscape of ecodemocracy in practice

1.1 Conduct a global piece of research into existing examples of ecodemocracy

2 Build up a network of potential implementers and promote the effecting of ecodemocracy

2.1 Draw up a list of public and private landowners and land managers who may be supportive

2.2 Advocate the implementation of ecodemocracy at a government level and in other forums

2.3 Write articles for journals

2.4 Gain coverage of our work in the green media

3.1 Create implementation toolkits targeted at different groups

3 Support and monitor the implementation of ecodemocracy

3.2 Gather feedback on early examples of implementation
